

Hello Felix!

Code

```
1 import 'package:flutter/material.dart';
2
3 class RowColumnExample extends StatelessWidget {
4   @override
5   Widget build(BuildContext context) {
6     final size = MediaQuery.of(context).size.width;
7     return Scaffold(
8       body: size > 600 ? HorizontalLayout() : VerticalLayout(),
9     );
10  }
11 }
12
```
